FREE Limited Trial Version

What's Included

The **FREE LIMITED TRIAL VERSION** has only the basic elements of the SEDS program but will give a very good understanding of how easy the program is to use, how quick and responsive the program is and how to use the SEDS program as a tool to help explain the meaning of test scores.

The **FREE TRIAL** includes:

1. Three tests often used by schools and outside evaluators.
2. A set of sample test scores for each test that you can key in, or you can enter test scores of your choosing.

Once the data are keyed in, and with one click, the results are immediately shown in two ways:

1. Each test is listed with the subtest scores presented in rank order
2. Clicking again will show all tests and test scores on the left side of the screen with all test scores displayed to the right on a bell curve

Note that all scores may then be shown or hidden allowing the viewers to focus on any or many test scores. **Be certain to download the easy-to-use manual** and to view all of the other features available with the full version.
